

CLAIMS

- 1 1. A children's trampoline comprising
 - 2 a rebounding surface having a periphery;
 - 3 a frame connected to said periphery to support the rebounding surface in
 - 4 an elevated position, and
 - 5 a child supporting device, said device including
 - 6 an armature having a lower end connected to the frame and an up-
 - 7 per end which extends above and over the rebounding surface, and
 - 8 a covering on said armature, said covering including a plurality of
 - 9 gripping portions which may be grasped by a child standing on the rebounding surface.
 - 1 2. The trampoline defined in claim 1 wherein said armature is rigid.
 - 1 3. The trampoline defined in claim 1 wherein said armature is resilient.
 - 1 4. The trampoline defined in claim 1 wherein said armature has segments extending
2 into said gripping portions.
 - 1 5. The trampoline defined in claim 1 wherein said covering is padded and in the
2 form of an animal or human character.
 - 1 6. The trampoline defined in claim 5 wherein said gripping portions comprise ex-
2 tremities of said character.
 - 1 7. The trampoline defined in claim 6 wherein said character has additional extremi-
2 ties which are flexible.
